**NOTES**

Power allows you to smoothly recline to any position, adjust the headrests, and adjust the lumbar supports.

A six-button wired power hand control on the right-hand side of the recliner allows you to control the reclining, headrest, and lumbar mechanisms independently. A single USB port is included on the top of the hand control.

A home feature returns the headrest, footrest, and lumbar support to their original positions.

A single USB port is included on each power button control on styles with arms.

**Home Button**

The home button returns the headrest, footrest, and lumbar support to their original positions. To activate the home button, press and hold the button used to lower the footrest.
