NOTES

Power allows you to smoothly recline to any position, adjust the headrests, and adjust the lumbar supports.

A six-button wired power hand control on the right-hand side of the recliner allows you to control the reclining, headrest, and lumbar mechanisms independently. A single USB port is included on the top of the hand control.

A home feature returns the headrest, footrest, and lumbar support to their original positions.

A single USB port is included on each power button control on styles with arms.

Home Button

The home button returns the headrest, footrest, and lumbar support to their original positions. To activate the home button, press and hold the button used to lower the footrest.
