NOTES

Power control on the arm effortlessly adjusts the recline, keeping you comfortable. Home button returns the headrest and footrest to their original positions with one touch. USB charging port built into power control keeps devices powered up and ready to use. Divided back cushion cradles your neck, back and lower lumbar for enhanced comfort. Streamlined inset padded armrests have a seamless look and comfortable feel. Built to last with our patented Flexsteel DualFlex Spring System™—sturdy steel ribbons attached to flexible coils that offer a wide range of motion and durability. High-density cushions consist of a high-resiliency, high-density polyurethane foam core with a soft fiber wrap that ensures comfort as you sit and recline. Available in over 250 fabrics to suit any décor. Available in durable, cleanable performance fabrics that will withstand everyday use by an active family. Removable back allows for easy lifting and maneuvering through doorways. Swivel mechanism allows seamless side-to-side motion. Gliding mechanism provides soothing movement that helps you relax. Handle-activated recline system on arm allows you to manually yet efficiently move between sitting and reclining. Footrest easily lowers when you apply pressure in a downward motion. Rocking recliner provides soothing movement in the seated position, helping you relax. The power control allows you to independently adjust the recline and headrest. A separate home button returns the headrest and footrest to their original positions with one touch. A USB port is included on the power control for powering electronics. Zero draw technology only uses power when the USB port is in use. Lower the footrest by applying pressure to it in a downward motion. Lowering the footrest with the handle can damage the recliner. Power allows you to smoothly recline to any position. A single USB port is included on each power button control on styles with arms.

Power Recline & Headrest
